

用 tikz 画简易时钟

kuing

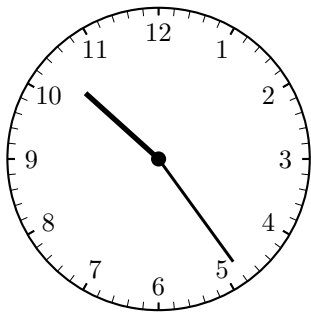

2016 年 3 月 8 日

这显然又是一个极其无聊之作，画法见源文件，我就不作解释了。

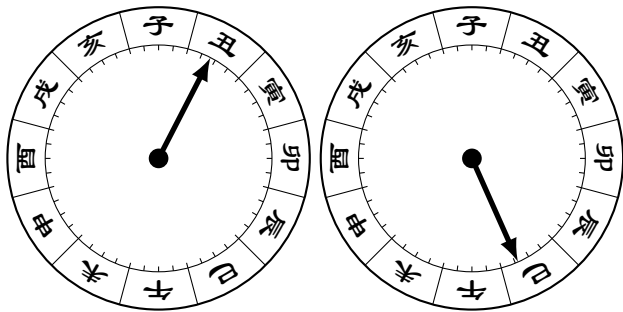

编译本文档的时刻是 1:49，用 `\clocknow` 输出编译的时刻：

用 `\clock{小时}{分钟}` 输出你想显示的时间，例如 `\clock{10}{24}` 得到：

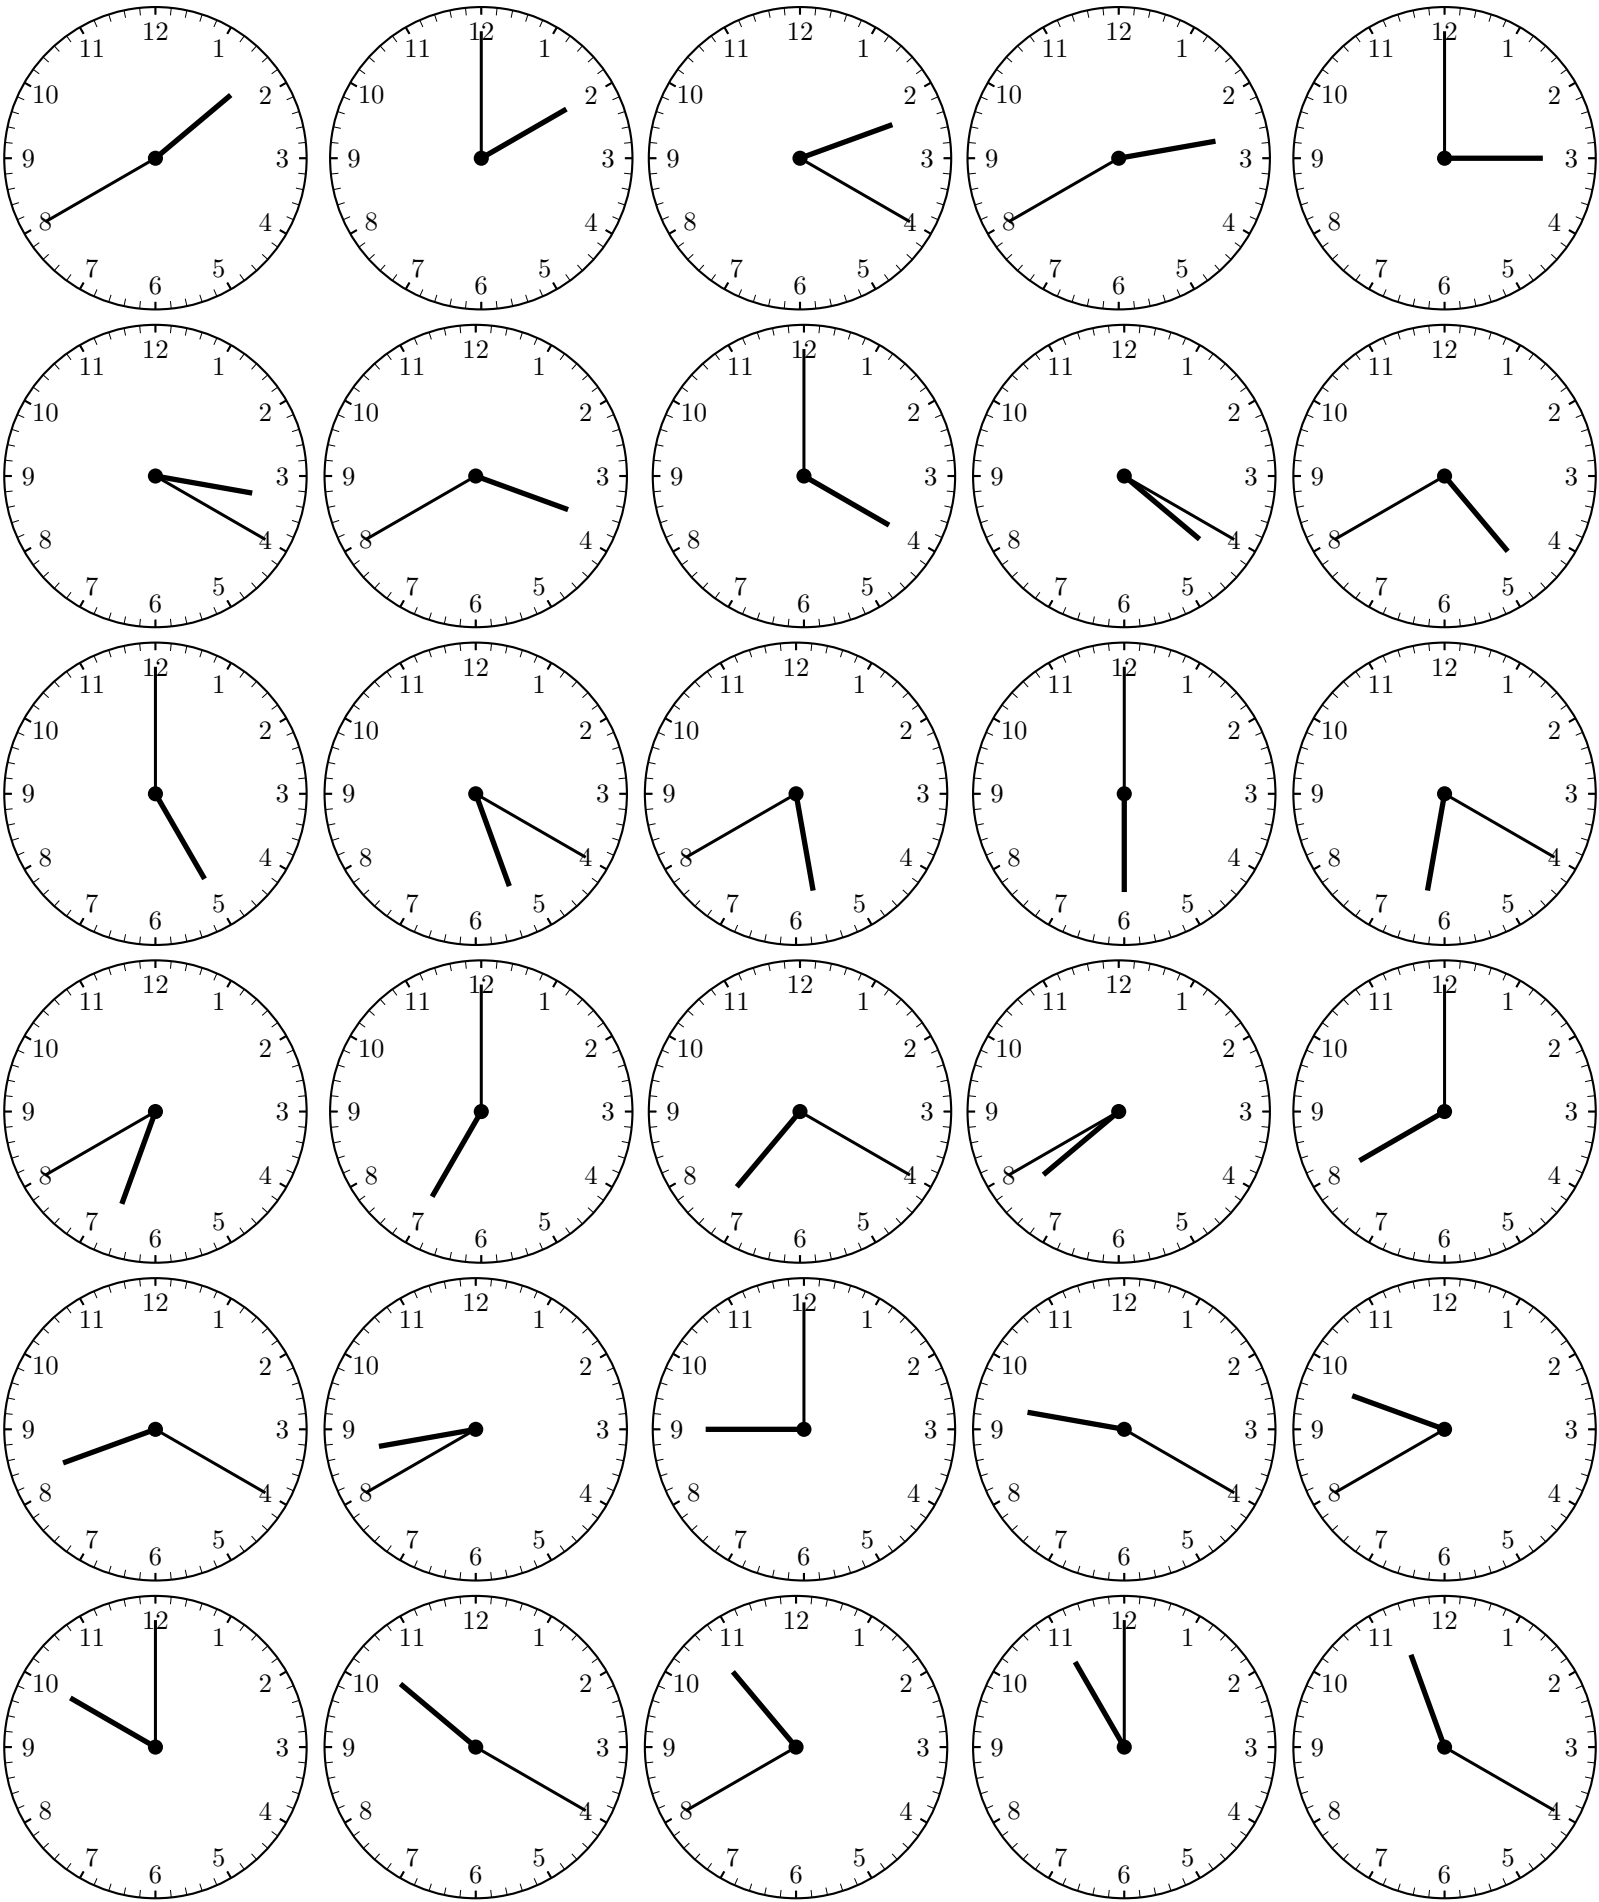

还有一个时辰版的，命令是 `\scclocknow` 和 `\scclock{小时}{分钟}`，效果：

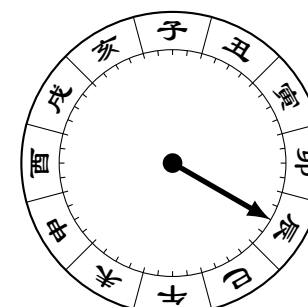

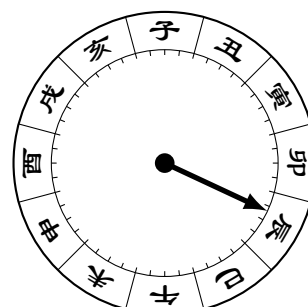

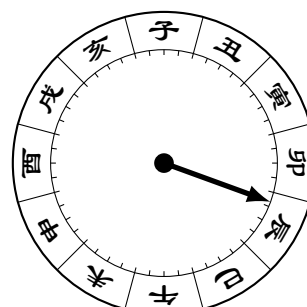

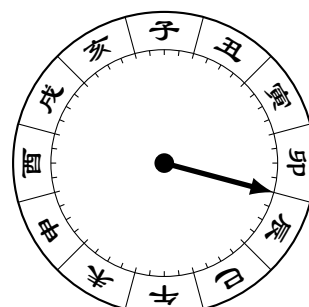

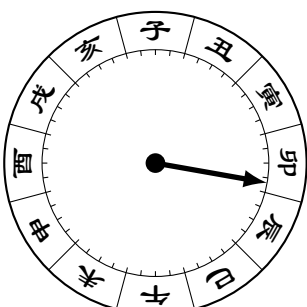

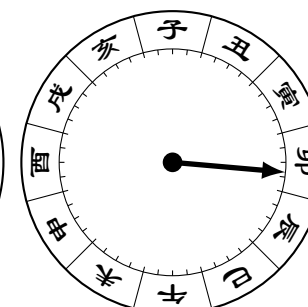

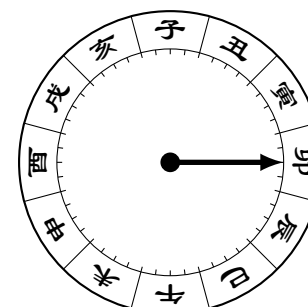

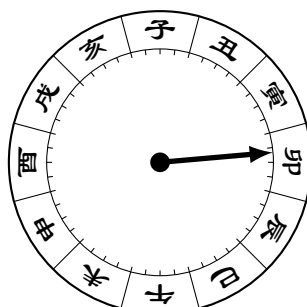

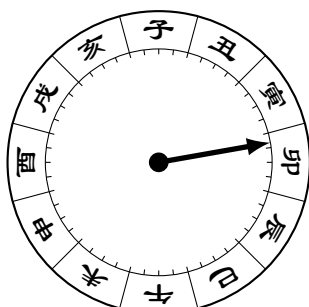

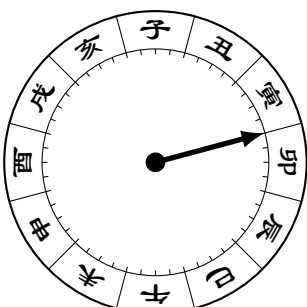

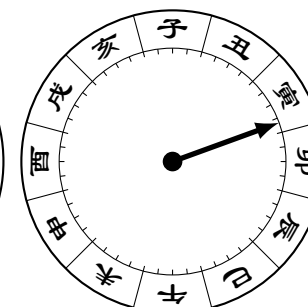

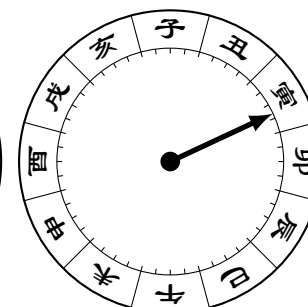

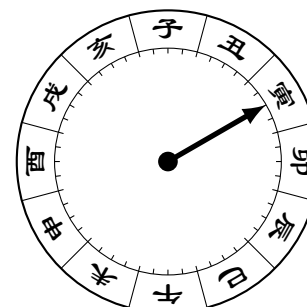

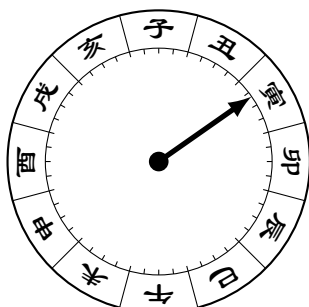

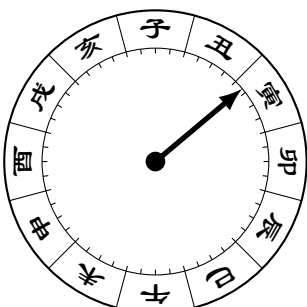

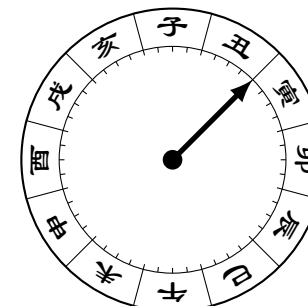

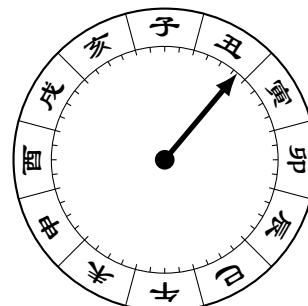

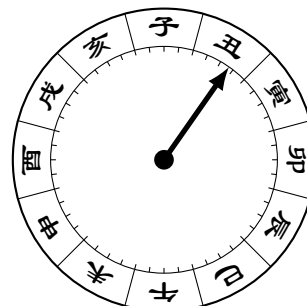

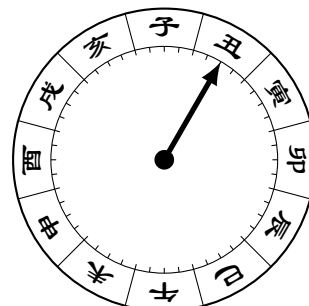

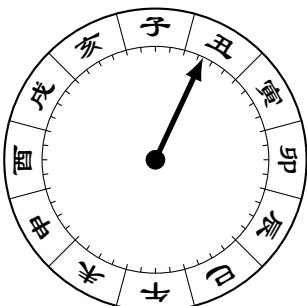

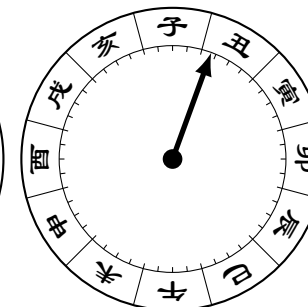

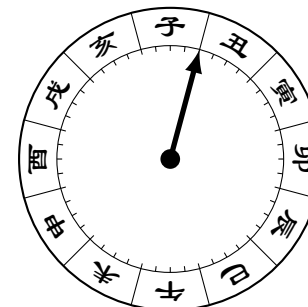

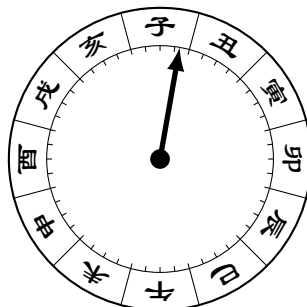

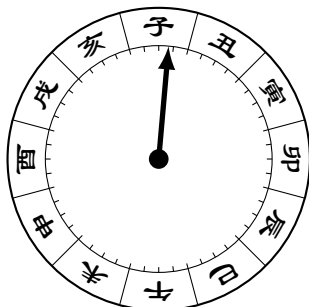

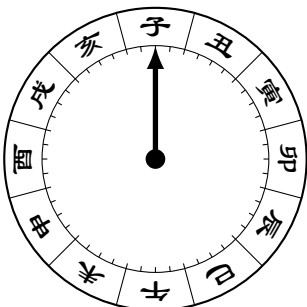

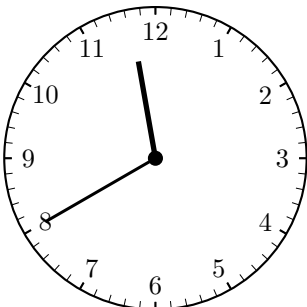

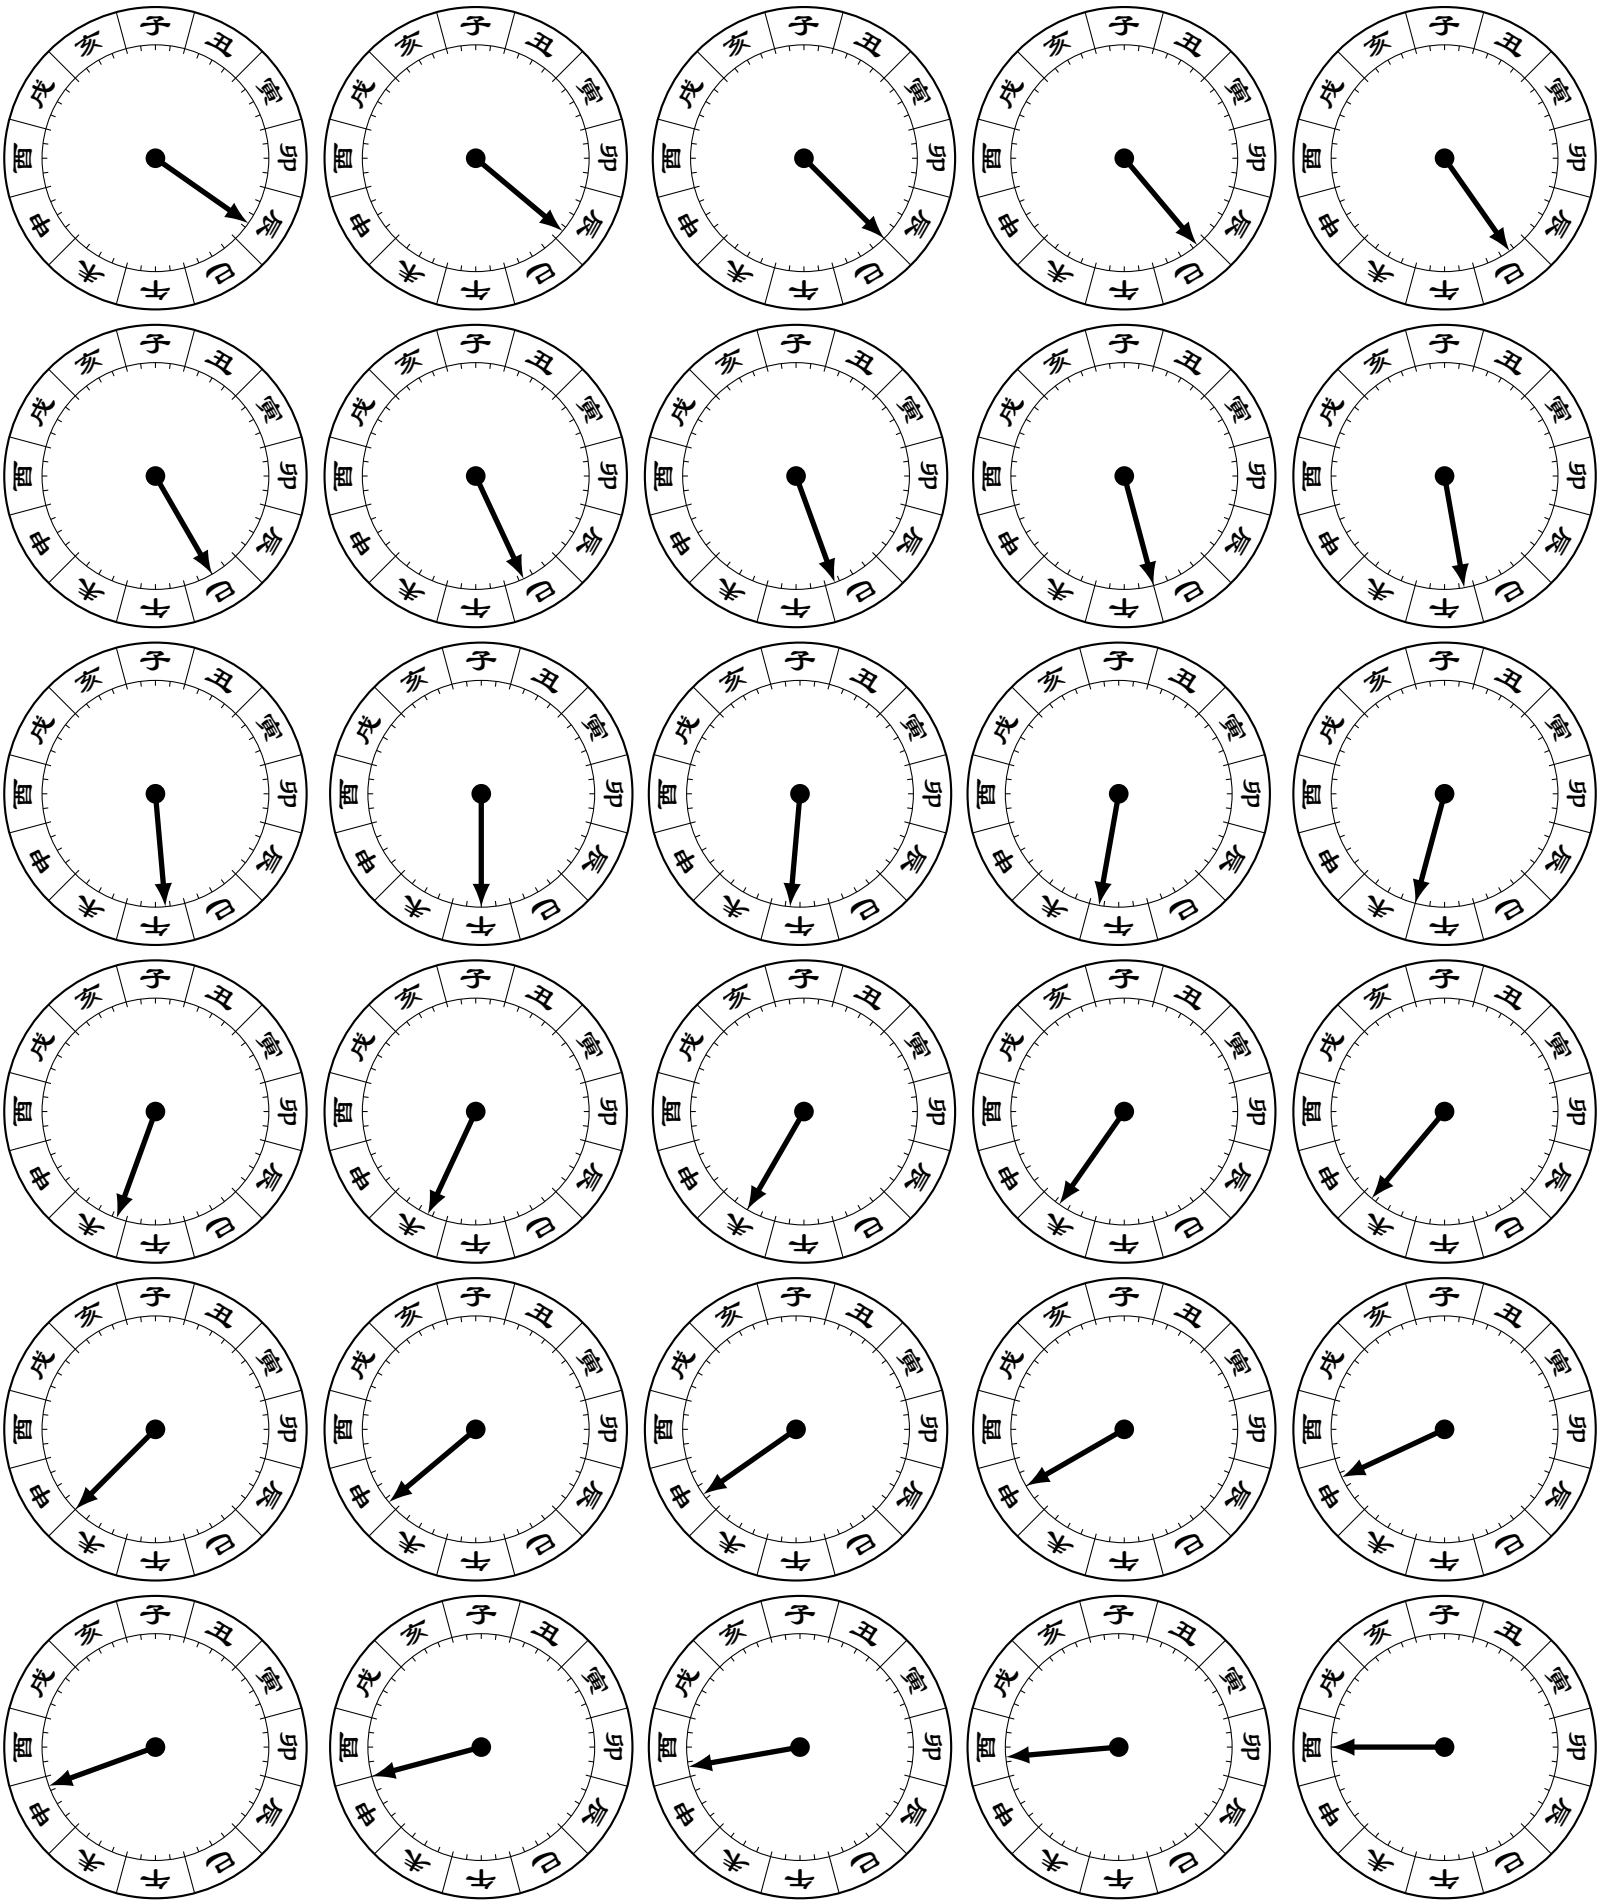

如果想改变某些长度宽度神马的，可以修改代码里的参数，随你自己弄了。

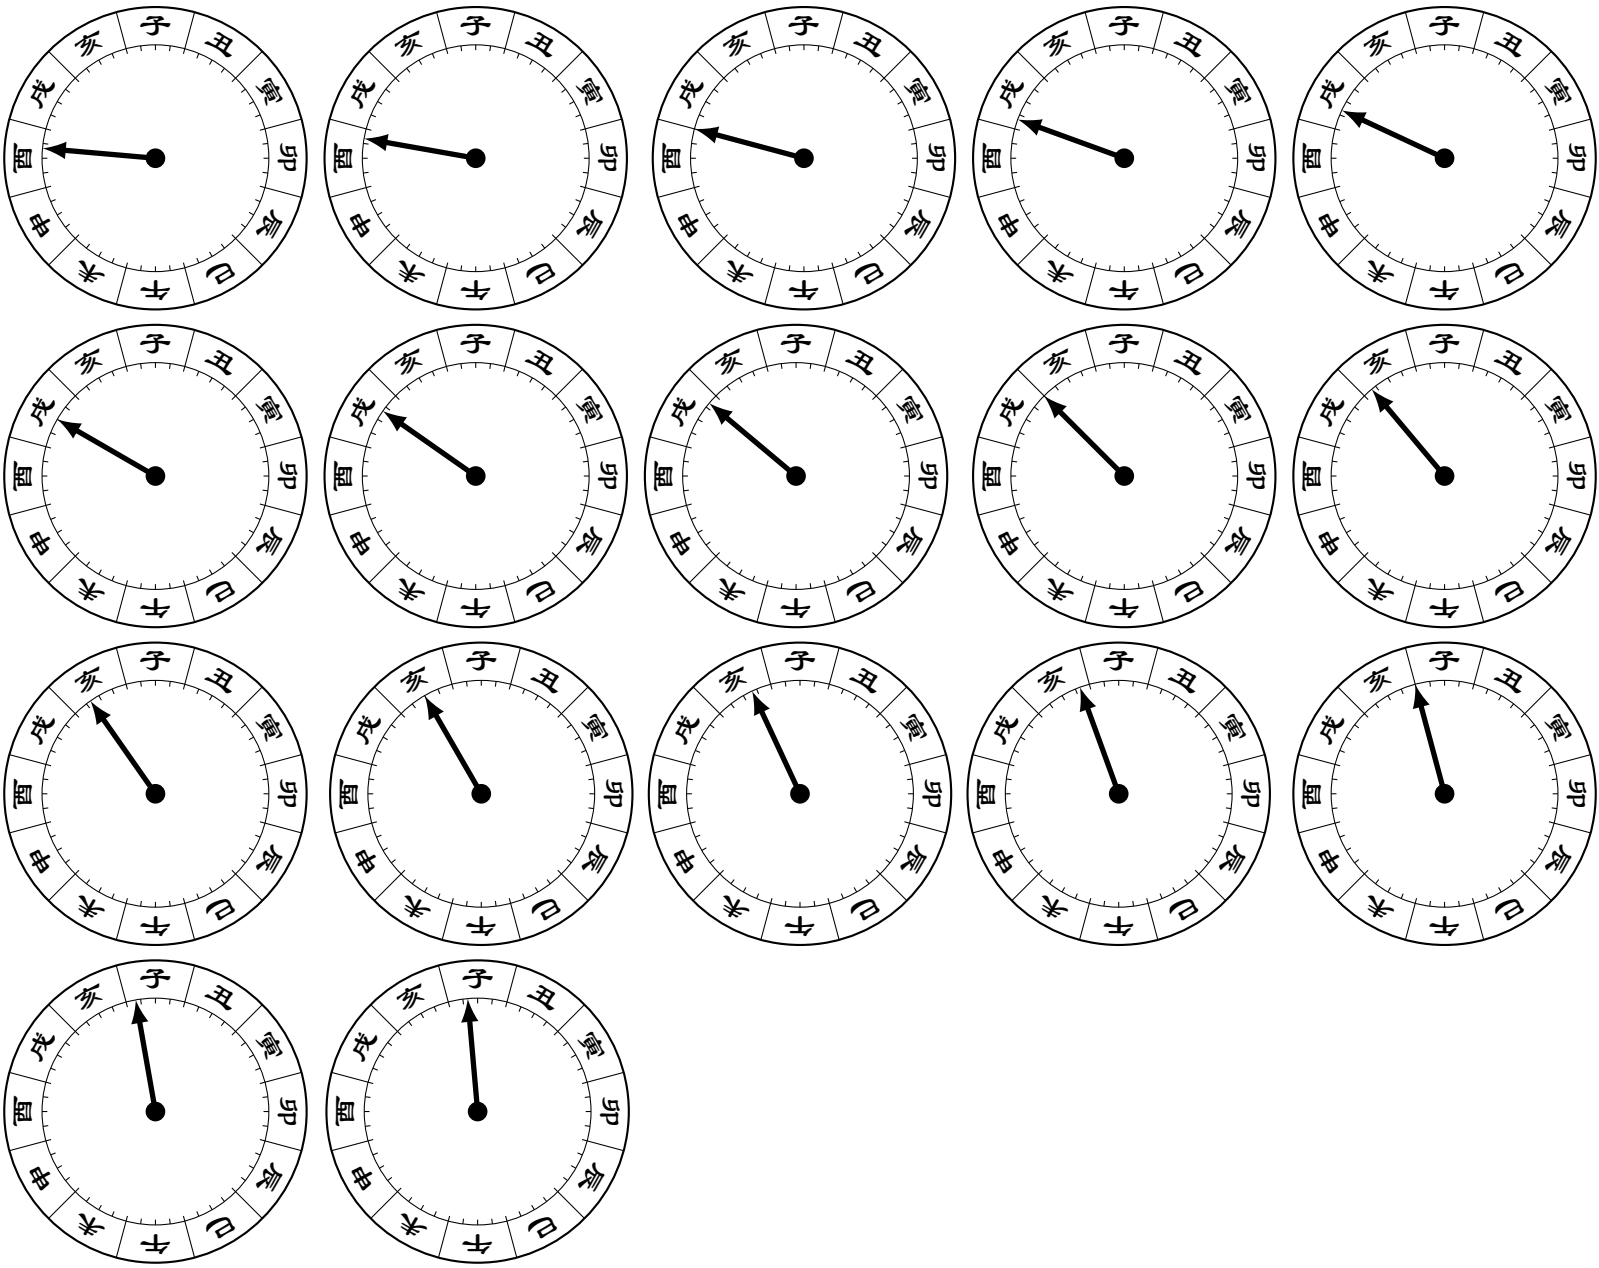

下面批量测试一下：

就素酱紫，够无聊了吧……
